

Marvira

City adventure, on foot.

What is Marvira?

Marvira is a GPS scavenger-hunt app for city exploration. Players walk to real places, answer location challenges, and compete on leaderboards. Organizers create hunts for events, tourism, venues, and schools — then share a single invite link.

Cities & tourism boards

Activate districts with walkable discovery routes that highlight local landmarks.

Venues & campuses

Offer self-guided experiences without building a custom app.

Schools

Turn local history and STEM into outdoor team challenges.

Organizers

Publish hunts, invite players, and celebrate results on a live leaderboard.

Marvira turns cities into playable scavenger hunts. Walk real places, solve challenges, and climb the leaderboard — or create hunts for your community.
